Visio Collection _ DESIGN PAUL MARIN

Visio Collection

Intensely Appealing

Distinguished by an open shelf on both sides and spacious drawers this storage collection, hand-crafted from solid oak or natural veneer, presents a strong and surprising light ambience.

The handles are tucked discretely behind the front surface; inside drawer cases are made of the same wood as the exterior. Easy gliding hardware allow the drawers to shut firmly and quietly, and the doors are specially fitted with soft buffers. The entire unit floats effortlessly above a brushed stainless steel frame.

With clean lines, a natural surfaces and hand crafted details, this group of sideboards effortlessly compliments and organises a range of interiors.

Batavia table system

Clever articulation

Based on subtle sculptural nuance and expert craftsmanship, the Batavia table possesses a straightforward usability. Always trying to reduce clutter, the discreet drawers imbedded in the table top keep supplies organised and off the table surface. An innovative joint system and precise engineering ensure an easy single action locking system for assembling the frame.

This seamless and sturdy table system allows for a combination of a desk, work table, dining table, coffee table, and café table, each with multiple drawers for storage, or if you choose, a table without drawers. This versatility allows for use in both residential and contract environments.

Nest : Feed _ DESIGN GARY CRUCE

Nest

birdhouse

'A 21st-century take on the classic all-weather birdhouse'

- Wallpaper*

Nest is designed to accommodate common cavity-nesting birds such as chickadees, house sparrows, wrens, and swallows. A natural structure of bentwood and laminate gives this birdhouse a light-hearted yet sophisticated form. Harmonious proportions and sensible detailing make Nest a modern pleasure for your home.

Feed

bird feeder

Avian Architecture

Welcome songbirds into your garden with a beautifully refined bird feeder. The natural allure of bentwood and clear windows attracts a variety of birds that are commonly found in every back-yard. Easy to fill and maintain; an over-hanging roof keeps birdseed dry and fresh. The innate elegance of Feed and its open design, encourages relaxation and enjoyment.

Specifications_ MATERIALS

Visio Collection _ DESIGN PAUL MARIN

Imbued with a natural inner warmth, this collection contains many variations. The lowboard is perfect as a media console in a living room, with enough room for storing CDs and videos. The smaller units are perfect as bedside tables and the larger units for storage space throughout the home or office.

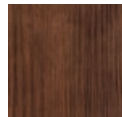

Materials and finishes

The Visio Storage unit is available in either solid heat treated dark oak, solid heat treated ash or a range of veneers. The Solid wood units are finished with a high quality oil, composed entirely of natural elements. The veneered units are finished with your choice of matte natural lacquer, standard transparent lacquer, or a high quality oil.

The Visio Collection is built from 18mm thick solid oak or veneered MDF. Drawer cases and shelves are made from same material as the exterior. The units are built with fine hardware including smooth and silent drawer glides and dampers.

The removable base is made of satin finished stainless steel with a plastic foot pad to protect the floor.

Batavia table system _ DESIGN PAUL MARIN

Various leg heights and a choice of table tops with different widths give birth to a wide range of design solutions. This page gives you an overview of the possibilities when planning your own Batavia table system. Elements with different sizes combined with a choice of table tops with or without drawers give plenty of scope to explore configurations to fit every room.

Materials and finishes

The Batavia Table is available in a variety of veneers, including Wenge, Natural Oak, Walnut and Teak. The Tables are finished with your choice of matte natural lacquer, standard transparent lacquer, or a high quality oil, composed entirely of natural elements.

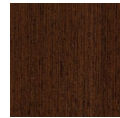

Teak

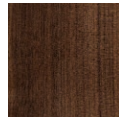

Natural Oak

Bleached Oak

Wenge

Walnut

The drawer handles on the underside are made of anodized aluminum, coloured black for Wenge and light grey aluminum for lighter toned woods.

The tabletop is made of a stainless steel core which gives it a solid structure.

The removable table legs are made from a stainless steel core which is then covered in a veneer. Anodized aluminum feet with a soft felt pad, protect the floor.

Nest : Feed _ DESIGN GARY CRUCE

Bring a sense of style to your home and garden.
Gary Cruce designed Nest for his own back-yard, the next logical progression is a companion called Feed.

Feed bird feeder

Made of European Birch laminate, with walls of clear plexiglas and a strong cord, this bird feeder is weatherproofed by a high quality oil, composed entirely of natural elements.

Hang Feed from an eave or shepherds hook, or even a tree branch. For easy refilling of seed, simply slide the top along the support cable and open Feed. Periodically clean out old bird seed and brush out soil and debris with a paintbrush or dry cloth.

Nest birdhouse

Made entirely of European Birch laminate, this birdhouse is weatherproofed by a high quality oil, composed entirely of natural elements.

Nest is easy to hang from a nail or screw mounted to a wall or post. A removable back panel makes cleaning easier; simply pull up on the finger hole until the locating pin at the bottom has disengaged the hole, then swing out the back panel.
